

CHAUVET®

WIRELESS IS THE FUTURE. THE FUTURE IS NOW.

WELL™
WIRELESS EVENT LED LUMINAIRE

UPLIGHTING... UNLEASHED

WELL™ is expertly crafted for maximum flexibility. Simply drop the units where you want them: against a wall, in the middle of a room, under or on top of furniture, in a park, at a fair, along a runway or in the middle of nowhere. Creativity awaits. No strings attached.

PASSION... SELF CONTAINED

Powering each WELL™ is a built-in 12-volt battery capable of running for over 12 consecutive hours. For control, standard DMX ports are available as well as a pre-installed Wireless Solution W-DMX receiver.

FOCUS ON THE SHOW

Not on cables, power runs, or unsightly fixtures. The WELL's reflective casing blends in the environment so that nothing comes between you and your show. Discreet and unobtrusive, it belies the dramatic impact of 12 high performance, tri-colored LEDs capable of projecting a smooth and even wash in vivid, saturated hues or soothing pastels – as your event dictates.

What's more, the LEDs are arranged in two arrays in a split plane that can be precisely angled with simple screw adjustments. As a result, one uplight can wash two different areas in the same color or in two different colors. For added versatility, a ratcheting foot can be extended to further manipulate the orientation of the wash without compromising stability.

IP44 rated for temporary outdoor use only

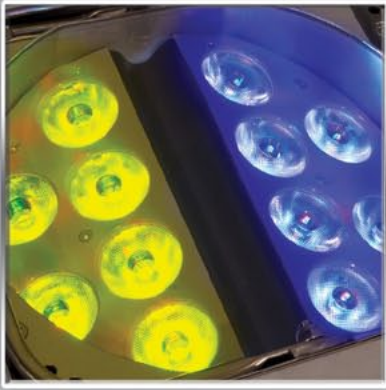

Completely wireless power and control

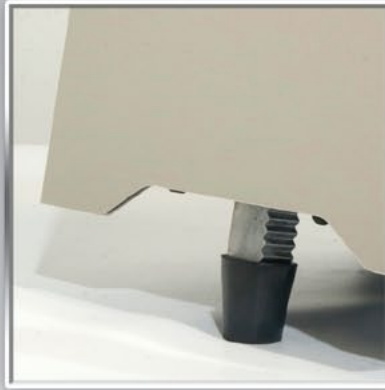

Full-featured control panel on the base of the unit

- 1 LED charge indicator
- 2 On/Off switch
- 3 12 high-power tri-color LEDs
- 4 Individually controllable arrays
- 5 Folding, easy-carry handle
- 6 Mirror finish
- 7 Rechargeable 12-hour battery
- 8 Stowable W-DMX™ antenna
- 9 3-pin DMX in/out
- 10 Full-featured control panel

Block control of LED arrays

Ratcheting foot aids in precise focusing

Simple external focusing

THE FUTURE
BODES

WELL™
WIRELESS EVENT LED LUMINAIRE

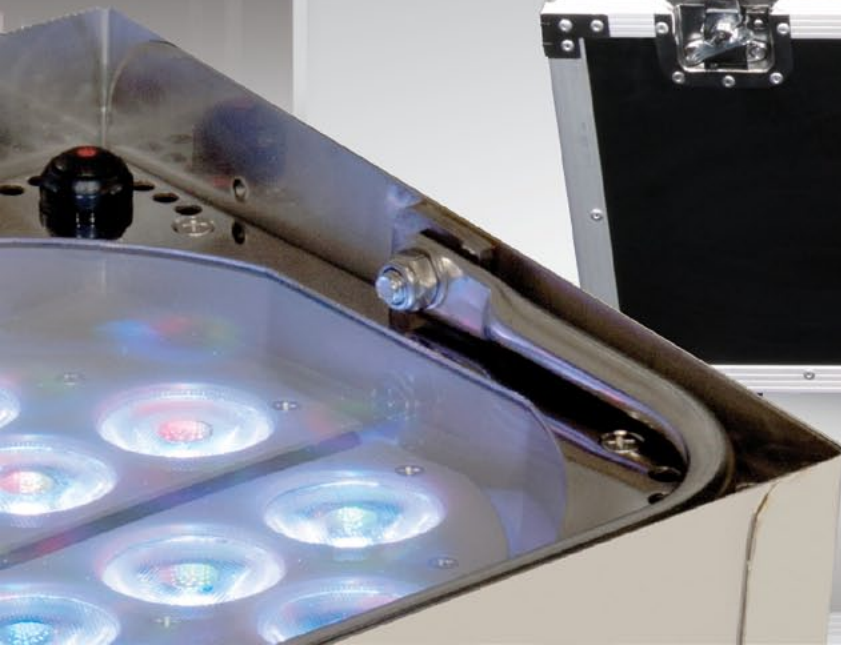

Mirror finish helps the fixture blend in

Neutrik® powerCON® connection for easy and secure charging

TAKE SIX AND NEVER LOOK BACK

WELL™ units offer maximum return on investment in packs of six fitted in a road case, which doubles as a gang charger. Simply place the fixtures into their slot, plug the road case into a power outlet, and charge all six at once. Clever. Easy.
